## Level

## Float switch <br> For industrial applications, with temperature output Model RLS-3000

## Applications

- Combined level and temperature measurement of liquids in machine building
- Control and monitoring tasks for hydraulic power packs, compressors and in cooling systems

## Special features

- Media compatibility: Oil, water, diesel, refrigerants and other liquids
■ Level: Up to 3 switching outputs, freely definable as normally open, normally closed or change-over contact
- Temperature: 1 bimetal temperature switch or Pt100/Pt1000, accuracy: Class B
■ Potential-free switching reed contacts

Fig. left: With cable outlet and spherical float Fig. right: With circular connector M12 x 1 and cylindrical float

Depending on customer wishes, the switching functions of normally open, normally closed or change-over can be realised for the defined liquid level.

The additional temperature output enables the medium temperature to be monitored by means of a preconfigured bimetal temperature switch or a Pt100/Pt1000 resistance signal.

## Specifications

| Float switch | Level | Temperature |
| :---: | :---: | :---: |
| Measuring principle | Potential-free switching reed contacts are triggered by a magnet in the float | Bimetal switch or Pt100/Pt1000 measuring resistor in pipe end |
| Measuring range | Guide tube length $\mathrm{L}: 60 \ldots 1,500 \mathrm{~mm}(2.5 \ldots 59 \mathrm{in})$, other lengths on request | $\begin{aligned} & \text { Bimetal switch: } 30 \ldots 150^{\circ} \mathrm{C}\left[86 \ldots 30{ }^{\circ} \mathrm{F}\right] \\ & \text { Pt100/Pt1000 } \end{aligned}$ |
| Output signal | Up to 3 switch points, depending on the electrical connection: L-SP1, L-SP2 ${ }^{11}$, L-SP3 ${ }^{1)}$ | $\begin{aligned} & \text { Bimetal switch } \\ & \text { Pt100, 2-wire } \\ & \text { Pt1000, 2-wire } \end{aligned}$ |

1) Versions with protective conductor on request
2) The stated ingress protection (per IEC/EN 60529) only applies when plugged in using mating connectors that have the appropriate ingress protection.
3) Not with process connection $G 1$, guide tube length $L \geq 100 \mathrm{~mm}[L \geq 3.94 \mathrm{in}]$
4) Guide tube length $L \leq 1,000 \mathrm{~mm}[\mathrm{~L} \leq 39.37 \mathrm{in}]$, switch points for level max. 2 NO/NC or 1 SPDT definable
5) Not with process connection G 1 , G $11 / 2$, guide tube length $L \geq 100 \mathrm{~mm}[L \geq 3.94 \mathrm{in}]$
6) Not with process connection G $1 / 8$
